Product Feature And Application

316 Stainless Steel Square Flush Lift Ring 76*58MM in various sizes have been used in the boating industry for a long time due to their corrosion resistance and durability in marine environments. They are commonly found on boat decks, hatches, and compartments, providing a convenient and secure grip for lifting heavy objects or accessing storage areas.

While specific details about the history of this particular product might be scarce, it is likely that it was developed to meet the demands of boat owners and manufacturers for a reliable and aesthetically pleasing lifting solution that can withstand the harsh conditions of marine environments. The usage of stainless steel ensures longevity and resistance to corrosion, allowing the 316 Stainless Steel Square Flush Lift Ring 76*58MM to endure saltwater exposure and extreme weather conditions commonly encountered on boats.

Overall, the 316 Stainless Steel Square Flush Lift Ring 76*58MM with the dimensions 48*38mm is part of a broader category of hardware designed for marine purposes, which have evolved and improved over time to meet the specific needs and challenges of the boating industry.

Product Details

Marine 316 Stainless Steel Square Flush Lift Ring 76*58MM are commonly used hardware accessories in marine applications. Here are some of the key features of this product:

Material: The lifting ring is made of high-quality stainless steel, which has excellent corrosion resistance and durability. This ensures it can withstand harsh marine environments and heavy use.

Flush Design: The square flush design allows the 316 Stainless Steel Square Flush Lift Ring 76*58MM to lie flat against the surface it is mounted on when not in use. This helps reduce any potential tripping hazards and prevents tripping over objects.

E-mail: andy@hardwaremarine.com

Dimensions: The lifting ring measures 76*58 mm, providing a spacious grip area for easy handling and lifting of heavy objects on board.

Weight-bearing capacity: While weight-bearing capacity may vary depending on the specific model and manufacturer, most stainless steel rings are designed to hold a considerable amount of weight. They can handle heavy loads and are suitable for a variety of lifting and towing applications on board ships.

Mounting: 316 Stainless Steel Square Flush Lift Ring 76*58MM are typically designed to be flush mounted, allowing them to be easily installed into pre-cut holes in a boat's deck, hatch or compartment. This provides a clean, seamless look while maintaining functionality.

Versatility: Lift rings can be used in a variety of applications on boats, such as lifting hatches, accessing storage rooms, lifting heavy equipment or objects and providing extra handles for safety.

Remember, always check the specific product manufacturer's guidelines and specifications to ensure proper use and installation of 316 Stainless Steel Square Flush Lift Ring 76*58MM on your boat.

Loading & Shipment

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
